TECHNICAL DETAILS

The website is built using HTML, CSS, and JavaScript. It features responsive design, ensuring optimal viewing across various devices.

- **HTML:** For structuring content
- **CSS:** For styling the website
- **JavaScript:** For interactivity
- **Responsive Design:** Ensures optimal viewing across devices

CHALLENGE FACED

- Ensuring responsiveness across devices
 - Integrating a secure payment gateway
 - Balancing functionality with user-friendly design
-

CONCLUSION

The KP'S Hotel website project has successfully created a platform that allows users to easily book tables, rooms, and access various hotel services. The intuitive design and responsive layout provide a seamless user experience, meeting the demands of today's digital-savvy customers

A dark, moody photograph of a spa interior. In the foreground, a person's legs are visible, standing on a stone ledge. Below the ledge is a pool of water, which reflects the legs and the surrounding environment. The background is dark and out of focus, showing some architectural elements like columns and a large stone vessel. The overall atmosphere is serene and luxurious.

FUTURE SCOPES

The website's future scope includes integrating spa services, developing a mobile app version, and improving search engine optimization (SEO) to attract more organic traffic and enhance visibility.

A person with long dark hair, wearing a dark robe, is sitting up in bed with their arms raised in a stretching motion. The room is dimly lit, with light coming from a window behind them showing a city skyline. A bedside table with a glass and some items is visible. The word 'THANKS' is overlaid in a large, elegant serif font.

THANKS
